## **DETAILED ACTION**

### ***Application Status***

1. In response to the previous Office action, a Non-Final rejection (mailed on 09/03/2009), Applicants filed a response and amendment received on 03/02/2010. In said amendment, claims 1-94 and 136-138 are canceled. Claims 95-135 are pending.

### ***Information Disclosure Statement***

2. The information disclosure statement (IDS) submitted on 12/10/2009 was filed after the mailing date of the Non-Final rejection mailed on 09/03/2009 after the filing of a request for continued examination on 6/4/09. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

### ***Examiner's amendment to the Claims***

3. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment shown below was given in a telephone interview with Natalie Lissy on May 18, 2010. Replace claim 129 of the claim listing filed on 03/02/2010 with the following re-written claim.

Claim 129. The method of claim 127, wherein the pH of the Tris buffer is 8.5.

***Statement of Reasons for Allowance***

4. Claims 95-135 are allowed. The following is an examiner's statement of reasons for allowance:

The instant invention is drawn to a crystal of infliximab comprising infliximab and specific components as recited in claims 95, 105, 115 and 125 and methods of preparing such infliximab crystals in claims 97, 107, 117 and 127; wherein infliximab is an antibody that was well-known at the time of instant invention. The specification discloses working examples that correspond to each of the recited crystals and methods as encompassed by the claims (see, e.g., specification at pp. 98-99).

The claimed infliximab crystals (and methods of preparing said infliximab crystals) are novel and unobvious in view of the non-infliximab components of the crystals (e.g., ethoxyethanol, lithium sulfate, and Tris buffer in claim 95), which crystals are useful for biomedical applications such as delivering large amounts of antibody in a small volume; it can be used to slow release infliximab antibody, for example.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
